Wireless module including Acclima TDR315H (DLS-TDR315)

DLS-TDR315-erinb

Description

DLS-TDR315

The Wireless Value DLS-TDR 315H measures soil moisture, EC and soil temperature. The Acclima is particularly suitable for use in open ground. Measurement results are transmitted wirelessly to the base station, where the data can be used for monitoring and analysis. The DLS-TDR 315H can be used for soil measurement in covered cultivation, in soft fruit and in open fields (for avocados, oranges, etc.).

- Memory capacity for storing 10,000 measurements
- Adjustable measurement interval
- Attractive IP65 ABS housing
- Existing system can be easily expanded with additional sensors
- User-replaceable battery
